PROFILE

Finance graduate with two years of self-directed work on stochastic-volatility calibration and derivatives pricing in Python and QuantLib, a working paper on neural-network option pricing, and a twelve-month placement in pharmaceutical business finance. Seeking a market risk, model validation, valuation or quantitative development analyst role.

EDUCATION

Postgraduate Diploma in Quantitative Finance City of London, United Kingdom
Bayes Business School (formerly Cass) – City, University of London Sept. 2023 – Jun. 2025

- a. Dissertation: *Neural Networks for Exotic Option Pricing*, supervised by Prof. Aleš Černý; published as an SSRN working paper (see below)

Bachelor of Science in Finance, Upper Second Class Honours Westminster, United Kingdom
Westminster Business School – University of Westminster Aug. 2019 – Jun. 2023

- a. Sandwich degree with a twelve-month placement; Mathematics for Finance 82%, Financial Modelling and Statistics 75%, Investments and Portfolio Management 75%, Dissertation 73%

EXPERIENCE

Finance & Operations Placement London, United Kingdom
Novo Nordisk UK Ltd Aug. 2021 – Aug. 2022

- a. Twelve-month industrial placement split between the Commercial Excellence and Business Finance Analytics & Pricing teams
b. Built sales-versus-target and cost-variance models in Excel and Power Query, and automated recurring reporting with VBA
c. Analysed market dynamics, brand performance and customer segmentation and presented findings to both teams; reconciled financial accounts, cleaned CRM data and collected competitor prices

PROJECTS

Heston and Bates calibration to SPX option trades github.com/boomelage/heston-calibration
Daily calibration of Heston (1993) and Bates (1996) parameters to CBOE SPX intraday option trades (2012 onward) with QuantLib: one pooled, money-neess-normalised implied-vol surface per trading day, box-constrained Levenberg–Marquardt from multiple data-seeded starts, an implied-vol-space acceptance gate rejecting boundary-pegged fits, and Feller and cross-day stability diagnostics. Hand-built prototype (2024), hardened and refactored with AI-assisted tooling.

ML option pricing (dissertation) github.com/boomelage/machine-learning-option-pricing
Feed-forward networks trained to approximate QuantLib Heston prices of barrier and Asian options on SPX, with training data generated from about 1,600 historical Heston calibrations (2012–2024); pricing errors below 1% at up to 99.8% lower computation time. Basis of the working paper below.

Heston simulation github.com/boomelage/heston-sim
Derivation and NumPy implementation of the Broadie–Kaya (2006) exact-variance scheme with Andersen’s (2008) trapezoidal integrated-variance approximation, following Prof. Ioannis Kyriakou’s lectures: exact non-central chi-squared variance draws and a closed-form log-price update.

Realised volatility github.com/boomelage/realised-volatility
Realised variance of JPM from one-minute prices (2006–2009) at 1, 5, 10, 15-minute and daily frequencies in pandas, compared against GARCH(1,1) conditional variance estimated in OxMetrics.

PUBLICATIONS

Briciu, Radu (Sept. 2024). “Neural Networks for Exotic Option Pricing”. SSRN working paper; MSc dissertation, Bayes Business School. DOI: [10.2139/ssrn.5104328](https://doi.org/10.2139/ssrn.5104328).

SKILLS

Programming: 🐍 Python 3 (NumPy, pandas, SciPy, scikit-learn, Keras, QuantLib), MATLAB, L^AT_EX; exposure to C and Rust

Finance and data tools: Bloomberg Terminal (OMON, VCUBE, historical data), Excel, Power Query, VBA, OxMetrics, Alpha Vantage API

Tooling: Git and GitHub, Bash, PowerShell, WSL, Jupyter, AI-assisted development (Claude Code)

Languages: Romanian (native), English (fluent), German (A1)

SELECTED COURSEWORK

Bayes: Derivatives – Fixed Income – Numerical Methods: Applications – Econometrics of Financial Markets – Risk Analysis – Blockchain, Cryptocurrencies and Decentralized Finance

Westminster: Mathematics for Finance – Financial Modelling and Statistics – Risk Management – Investments and Portfolio Management – Securities Analysis – Corporate Finance – Advanced Corporate Finance
